TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY INDEX, VOLUMES 161–170

This Index includes Memoirs published during the period NOVEMBER 1971–AUGUST 1972

	Vol.	Pages
AHARONOV, DOV and KIRWAN, W. E. A method of symmetrization and applications	163	369–377
——— A method of symmetrization and applications. II	169	279–291
AIGNER, MARTIN and PRINS, GEERT. Segment-preserving maps of partial orders	166	351–360
AKIN, ETHAN. Transverse cellular mappings of polyhedra	169	401–438
ALEXANDER, J. C. Cobordism Massey products	166	197–214
ALLDAY, CHRISTOPHER. On the rank of a space	166	173–185
ALTMAN, ALLEN. The size function on abelian varieties	164	153–161
ANDERSON, J. M. Müntz-Szasz type approximation and the angular growth of lacunary integral functions	169	237–248
ANDERSON, J. M. and BINMORE, K. G. Closure theorems with applications to entire functions with gaps	161	381–400
ANDERSON, WILLIAM J. Local behaviour of solutions of stochastic integral equations	164	309–321
ANSHEL, MICHAEL. Non-Hopfian groups with fully invariant kernels. I.	170	231–237
ARNOLD, DAVID M. Exterior powers and torsion free modules over discrete valuation rings	170	471–481
ARNOLD, JAMES E., JR. Local to global theorems in the theory of Hurewicz fibrations	164	179–188
ARTSTEIN, ZVI. Set-valued measures	165	103–125
ASH, J. MARSHALL and WELLAND, GRANT V. Convergence, uniqueness, and summability of multiple trigonometric series	163	401–436
BACHELIS, GREGORY F. and PIGNO, LOUIS. A characterization of compact multipliers	165	319–322
BAERNSTEIN, ALBERT II. A representation theorem for functions holomorphic off the real axis	165	159–165
BANCHOFF, THOMAS F. The two-piece property and tight n-manifolds-with-boundary in E^n	161	259–267
BARNES, BRUCE A. Locally B^*-equivalent algebras	167	435–442
——— Strictly irreducible *-representations of Banach *-algebras	170	459–469
BARTELT, M. W. Approximation in operator algebras on bounded analytic functions	170	71–83
BASMAJI, B. G. Modular representations of metabelian groups	169	389–399

	Vol.	Pages
BAXTER, JOHN R. Restricted mean values and harmonic functions	167	451–463
BECK, ROBERT E. Connections on semisimple Lie groups	164	453–460
BEHRENS, MICHAEL FREDERICK. The maximal ideal space of algebras of bounded analytic functions on infinitely connected domains	161	359–379
BENNETT, G. The gliding humps technique for *FK*-spaces	166	285–292
BENSON, C. T. and CURTIS, C. W. On the degrees and rationality of certain characters of finite Chevalley groups	165	251–273
BERG, KENNETH. Quasi-disjointness in ergodic theory	162	71–87
BERRY, JOHN W. Almost recursively enumerable sets	164	241–253
BINMORE, K. G. and ANDERSON, J. M. Closure theorems with applications to entire functions with gaps	161	381–400
BISHOP, ERRETT and CHENG, HENRY. Constructive measure theory	Memoir No. 116	
BLAKE, I. F. and DJOKOVIĆ, D. Ž. An optimization problem for unitary and orthogonal representations of finite groups	164	267–274
BLATTER, JÖRG. Grothendieck spaces in approximation theory	Memoir No. 120	
BLAU, HARVEY I. Erratum to "Under the degree of some finite linear groups"	162	475
BLOZINSKI, A. P. On a convolution theorem for $L(p, q)$ spaces	164	255–265
BLUM, J. R. and MIZEL, V. J. A generalized Weyl equidistribution theorem for operators, with applications	165	291–318
BOGAR, G. A. Oscillation properties of two term linear differential equations	161	25–33
BOULDIN, RICHARD. Essential spectrum for a Hilbert space operator	163	437–445
BOWEN, RUFUS. Entropy-expansive maps	164	323–331
BOYD, WILLIAM S., JR. Repairing embeddings of 3-cells with monotone maps of E^3	161	123–144
BRACE, J. W. and KNEECE, R. ROYCE. Approximation of strictly singular and strictly cosingular operators using nonstandard analysis	168	483–496
BRIDGLAND, T. F., JR. Extreme limits of compacta valued functions	170	149–163
BROSAMLER, GUNNAR A. On the asymptotic behaviour of non-negative solutions of a certain integral inequality	165	275–289
BROWN, B. M. and EAGLESON, G. K. Martingale convergence to infinitely divisible laws with finite variances	162	449–453

	Vol.	Pages
BROWN, JAMES R. Inverse limits, entropy and weak isomorphism for discrete dynamical systems	164	55–66
BROWN, ROBERT F. and STERN, RONALD J. The number of roots in a simply-connected H-manifold	170	499–505
BROWN, RON and WARNER, HOYT D. Quadratic extensions of linearly compact fields	163	379–399
BROWN, W. C. Some splitting theorems for algebras over commutative rings	162	303–315
BRYANT, J. L. Approximating embeddings of polyhedra in codimension three	170	85–95
BRYANT, J. L. and LACHER, R. C. Mapping cylinder neighborhoods of one-complexes in four-space	164	333–339
BUCKHOLTZ, J. D. and SHAW, J. K. Zeros of partial sums and remainders of power series	166	269–284
BURNS, R. G. On the finitely generated subgroups of an amalgamated product of two groups	169	293–306
BUSBY, ROBERT C., SCHOCHETMAN, IRWIN and SMITH, HARVEY A. Integral operators and the compactness of induced representations	164	461–477
CAMPBELL, DOUGLAS MICHAEL. Locally univalent functions with locally univalent derivatives	162	395–409
CANNON, JAMES W. *-taming sets for crumpled cubes. I: Basic properties	161	429–440
——— *-taming sets for crumpled cubes. II: Horizontal sections in closed sets	161	441–446
——— *-taming sets for crumpled cubes. III: Horizontal sections in 2-spheres	161	447–456
CARLSON, JAMES A. Some degeneracy theorems for entire functions with values in an algebraic variety	168	273–301
CHALMERS, BRUCE L. A unified approach to uniform real approximation by polynomials with linear restrictions	166	309–316
CHAN, YUEN-KWOK. A constructive approach to the theory of stochastic processes	165	37–44
CHEN, KUANG-HO. Symmetrization of distributions and its application	162	455–471
CHENG, HENRY and BISHOP, ERRETT. Constructive measure theory	Memoir No. 116	
CHERNOFF, PAUL R. Some remarks on quasi-analytic vectors	167	105–113
CHOI, CHANG. On subgroups of M_{24}. I: Stabilizers of subsets	167	1–27

	Vol.	Pages
CHOI, CHANG. On subgroups of M_{24}. II: The maximal subgroups of M_{24}	167	29–47
CLANCEY, K. F. and PUTNAM, C. R. The local spectral behavior of completely subnormal operators	163	239–244
COFFMAN, C. V. and WONG, J. S. W. Oscillation and nonoscillation of solutions of generalized Emden-Fowler equations	167	399–434
COMER, STEPHEN D. A sheaf-theoretic duality theory for cylindric algebras	169	75–87
COUGHLIN, RAYMOND and RICH, MICHAEL. Associo-symmetric algebras	164	443–451
COVEN, ETHAN M. and KEANE, MICHAEL S. The structure of substitution minimal sets	162	89–102
CUNNINGHAM, JOEL. Quotient sheaves and valuation rings	164	227–239
CURTIS, C. W. and BENSON, C. T. On the degrees and rationality of certain characters of finite Chevalley groups	165	251–273
DANCS, SUSAN CLAIRE. Abelian subgroups of finite p-groups	169	489–493
DANIEL, VICTOR W. Convolution operators on Lebesgue spaces of the half-line	164	479–488
DAUNS, JOHN. Categorical W^*-tensor product	166	439–456
——— Simple modules and centralizers	166	457–477
DAVERMAN, ROBERT J. Slicing theorems for n-spheres in Euclidean $(n + 1)$-space	166	479–489
DAVID, JOHN. A non-Noetherian factorial ring	169	495–502
DIEDERICH, JIM. Removable sets for pointwise solutions of elliptic partial differential equations	165	333–352
DIETRICH, WILLIAM E., JR. On the ideal structure of Banach algebras	169	59–74
DITOR, SEYMOUR Z. and EIFLER, LARRY Q. Some open mapping theorems for measures	164	287–293
DJOKOVIĆ, D. Ž. and BLAKE, I. F. An optimization problem for unitary and orthogonal representations of finite groups	164	267–274
DUBINSKY, ED and RAMANUJAN, M. S. On λ-nuclearity	Memoir No. 128	
DUCHATEAU, PAUL. The Cauchy-Goursat problem	Memoir No. 118	
DUNKL, CHARLES F. and RAMIREZ, DONALD E. Weakly almost periodic functionals carried by hypercosets	164	427–434
——— C^*-algebras generated by Fourier-Stieltjes transforms	164	435–441
EAGLESON, G. K. and BROWN, B. M. Martingale convergence to infinitely divisible laws with finite variances	162	449–453

	Vol.	Pages
EBERHART, CARL and SELDEN, JOHN. One-parameter inverse semigroups	168	53–66
EBERLEIN, PATRICK. Geodesic flow in certain manifolds without conjugate points	167	151–170
EDWARDS, R. D. and GLASER, L. C. A method for shrinking decompositions of certain manifolds	165	45–56
EFROYMSON, GUSTAVE. Solid k-varieties and Henselian fields	170	187–195
EIFLER, LARRY Q. and DITOR, SEYMOUR Z. Some open mapping theorems for measures	164	287–293
ELLIOTT, ROBERT J. and KALTON, NIGEL J. The existence of value in differential games	Memoir No. 126	
ELLIS, DAVID. An energy inequality for higher order linear parabolic operators and its applications	165	167–206
ELLIS, ROBERT and KEYNES, HARVEY. A characterization of the equicontinuous structure relation	161	171–183
EVANS, BENNY and MOSER, LOUISE. Solvable fundamental groups of compact 3-manifolds	168	189–210
EVANS, MICHAEL J. L_p derivatives and approximate Peano derivatives	165	381–388
FAIERMAN, M. Asymptotic formulae for the eigenvalues of a two-parameter ordinary differential equation of the second order	168	1–52
FALTINGS, KAI. On the automorphism group of a reduced primary Abelian group	165	1–25
FARIAS, ANTONIO O. Orientation-preserving mappings, a semigroup of geometric transformations, and a class of integral operators	167	279–289
FAULKNER, JOHN R. A geometry for E_7	167	49–58
FEARNLEY, LAWRENCE. Classification of all hereditarily indecomposable circularly chainable continua	168	387–401
FEUSTEL, C. D. On replacing proper Dehn maps with proper embeddings	166	261–267
FISHER, MICHAEL J. Singular integrals and fractional powers of operators	161	307–326
FOSTER, D. M. On Cartan subalgebras of alternative algebras	162	225–238
FRIEDMAN, AVNER. Limit behavior of solutions of stochastic differential equations	170	359–384
FRIEDMAN, AVNER and SCHUSS, ZEEV. Degenerate evolution equations in Hilbert space	161	401–427
FUKUSHIMA, MASATOSHI. Dirichlet spaces and strong Markov processes	162	185–224

	Vol.	Pages
GABOR, AKIVA. Remarks on the wave front of a distribution	170	239–244
GAJENDRAGADKAR, P. Norm of a derivation on a von Neumann algebra	170	165–170
GARIEPY, RONALD. Current valued measures and Geöcze area	166	133–146
GIBBONS, JOEL C. One-dimensional basic sets in the three-sphere	164	163–178
GILES, ROBIN. A generalization of the strict topology	161	467–474
GLASER, L. C. and EDWARDS, R. D. A method for shrinking decompositions of certain manifolds	165	45–56
GLASS, A. M. W. Polars and their applications in directed interpolation groups	166	1–25
GLEIT, ALAN. A characterization of M-spaces in the class of separable simplex spaces	169	25–33
GOLDSTEIN, LARRY JOEL. Relative imaginary quadratic fields of class number 1 or 2	165	353–364
GOODEARL, K. R. Singular torsion and the splitting properties	Memoir No. 124	
GOODMAN, VICTOR. A divergence theorem for Hilbert space	164	411–426
GOOTMAN, ELLIOT C. Primitive ideals of C^*-algebras associated with transformation groups	170	97–108
GORDON, C. MCA. Knots whose branched cyclic coverings have periodic homology	168	357–370
GRANIRER, EDMOND E. Exposed points of convex sets and weak sequential convergence	Memoir No. 123	
GRÄTZER, G. and LAKSER, H. The structure of pseudocomplemented distributive lattices. III: Injective and absolute subretracts	169	475–487
GREEN, MARK L. Holomorphic maps into complex projective space omitting hyperplanes	169	89–103
GREENFIELD, STEPHEN J. and WALLACH, NOLAN R. Automorphism groups of bounded domains in Banach spaces	166	45–57
GRESSER, JOHN T. The local behavior of principal and chordal principal cluster sets	165	323–332
GRETSKY, N. E. and UHL, J. J., JR. Bounded linear operators on Banach function spaces of vector-valued functions	167	263–277
GROSS, FRED. Prime entire functions	161	219–233
GROSS, FRED and YANG, CHUNG-CHUN. The fix-points and factorization of meromorphic functions	168	211–219
GRUNBAUM, F. ALBERTO. Linearization for the Boltzmann equation	165	425–449

	Vol.	Pages
HAHN, KYONG T. Subordination principle and distortion theorems on holomorphic mappings in the space C^n	162	327–336
——— Erratum to "Subordination principle and distortion theorems on holomorphic mappings in the space C^n"	170	507–508
HALL, WILLIAM S. The bifurcation of solutions in Banach spaces	161	207–218
HALLAM, THOMAS G. A comparison principle for terminal value problems in ordinary differential equations	169	49–57
HALPERN, HERBERT. Integral decomposition of functionals on C^*-algebras	168	371–385
HANSELL, R. W. Borel measurable mappings for nonseparable metric spaces	161	145–169
HARRIS, DOUGLAS. Structures in topology	Memoir No. 115	
HARRIS, MORTON E. A characterization of odd order extensions of the finite projective symplectic groups PSp(4, q)	163	311–327
HARTZMAN, CARL S. Transversals to the flow induced by a differential equation on compact orientable 2-dimensional manifolds	167	359–368
HARVEY, REESE and POLKING, JOHN C. A notion of capacity which characterizes removable singularities	169	183–195
HEDBERG, LARS INGE. Approximation in the mean by analytic functions	163	157–171
